From 1th June **€360**

In June 2009 Lisbon will receive at the Hotel Olisippo Oriente the second edition of the Digital Security Forum.

After a very well received first edition, in 2009 the event will offer better infrastructures and the participation of more highly recognized international speakers.

The event will include two days of conferences, the first day fully dedicated to Information Security Governance, and the last day to Technical Information Security presentations, preceded by a day of workshops and training.
